DI TECNOLOGIA

Modern C++

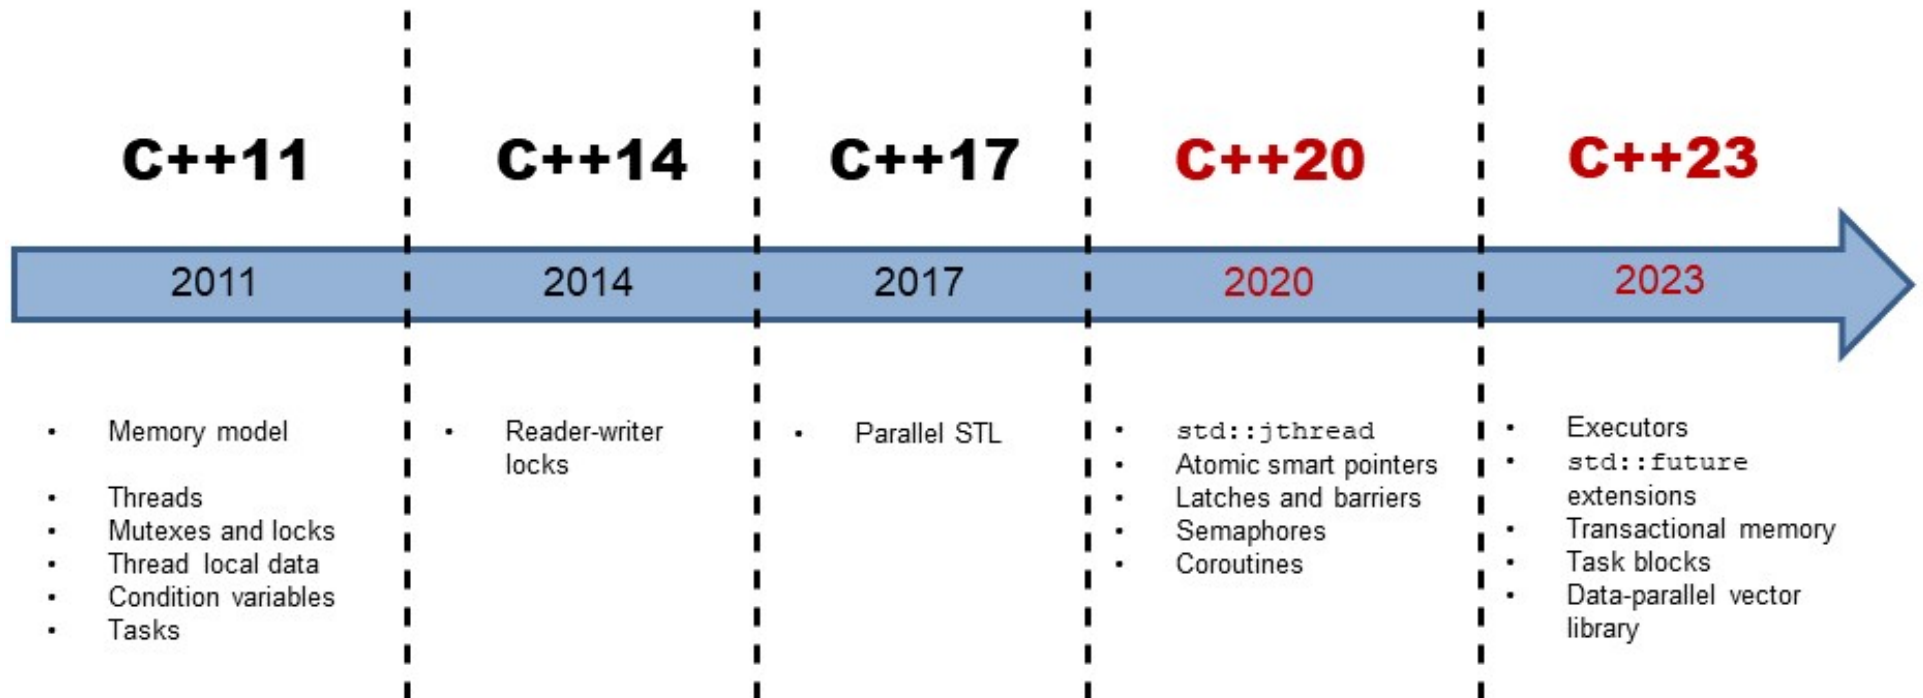

202x

Modern C++

Modern C++: from 98/03 to 11, 14, 17

Modern C++

Prerequisites

To fully understand the course, it is required:

- Basic knowledge of standard C++98

The program

- 1 Presentation of the course, tools**
- 2 Prerequisites: refresh of C++98**
- 3 The basics: nullptr, auto, type aliases, initializer list, uniform initialization**
- 4 The basics: range-based loops, constexpr, scoped enums, override and final.**
- 5 Advanced topics: Lambda functions, STL containers, algorithms**
- 6 Advanced topics: Move semantics, Smart pointers**

The program

- 7 Advanced topics: Multithread**
- 8 Advanced topics: New features in C++20**
- 9 Hands on code**
- 10 Correction and discussion of the final assignment**

The final assignment

- You will fork a GitHub repository with some code to develop / questions to answer / report to write / ...
- You will develop the assignment and push on your fork.
- We shall review the assignment and discuss in the last lesson.
